**PROJECT ACTIVITIES**

**Public engagement activity**

Two ESRs, Mr. João Vale and Mr. Pedro Alves from the University of Porto (UoP) are ongoing to the Imedica S.A. (IMED) during public engagement activities in order to coordinate a 3-week summer school. Their purpose is to work towards creating awareness among the general public of the research work performed and its implications for citizens and society.

**Workshop activities**

During two 2-month exchanges from the University of Thessaly (UTH) to the Center for Technology Research & Innovation (CETRI), Dr. Antonia Kaltsatou and Dr. Konstantina Pouliani attribute were seconded to CETRI to lead a workshop on “PET/CT imaging”.

This workshop was focused on technical aspects of image analysis. During this activity, Dr. Pouliani and Dr. Kaltsatou shared interesting information on PET/CT technology, as well as, they shared UTH expertise and experience on PET/CT imaging.

Moreover, Dr. Tiago Sotto Mayor from the University of Porto (UoP) travelled to Imedica S.A. (IMED) to implement workshop activity. During this activity, Dr. Mayor will lead a workshop on heat and mass transfer phenomena related to BAT in order to focus on technical aspects of BAT biology and to replicate the expertise and the knowledge.

This project has received funding from the European Union’s Horizon 2020 research and innovation programme under the Marie Skłodowska-Curie grant agreement No 645710
